

Culture and handicraft

Each tiled stove is uniquely decorated. The picture shows the recreation of tiles for an English castle.

Decor design created by artisans

For more than 150 years, skilled artisans have worked with ceramics in Timmernabben on the Swedish east coast. The production allows the glazing, the decors and the dimensions to fit into every environment.

Let us design and form a unique tiled stove just for you!

Classic tiled stoves – rectangular

Strömsrum

Timeless favourites

Gabriel rectangular tiled stoves enhance every home when they spread their pleasant warmth and fireside comfort.

The different models with rectangular forms are inspired of traditional tiled stoves from past times and fit just as well in classical as modern environments.

Elegant decors

Gabriel's hand-painted decors are created by artists and offer decoration, which makes every tiled stove unique.
