

## Osier

The Osier is an octagonal untiled stove with impressive credentials. Made in the U.K., this is a very clean burning and efficient slow heat release stove, with the option to increase or reduce the height due to its modular design.

It has been chosen for the Oxford Eco House, various National Trust buildings and homes where the owners have an emphasis on both aesthetics and the environment.

Defra approved for smokeless zones and ecodesign compliant to the latest standards : EN 15250

### Technical data

CE marking: EN 15250

Height: 2032mm for standard 9 ring stove

Weight: 1,300 kg
